

SOUDAL

Facts & Figures

A consolidated turnover of \$938 million in 2018; 350 million sealant and polyurethane foam units produced in 19 production branches; around 3,100 employees worldwide; almost \$66 million in investment in 2018: those are the impressive facts and figures of the Soudal Group.

Our Activities

The Soudal Group manufactures products for its own brands and private labels covering 7 groups: silicones and other sealants, polyurethane foams, adhesives, hybrid polymers, technical aerosols and chemical building products. With its own brands the Soudal Group is focusing on 3 market segments: the construction, industrial and retail sectors.

Sustainability

The Soudal Group is leading the way in the development of products for sustainable construction, which are safe for people and the environment. As a result of the most modern production technology, energy, water usage and residual waste is limited. It is obvious that the welfare of employees is another priority.

SOUDAL

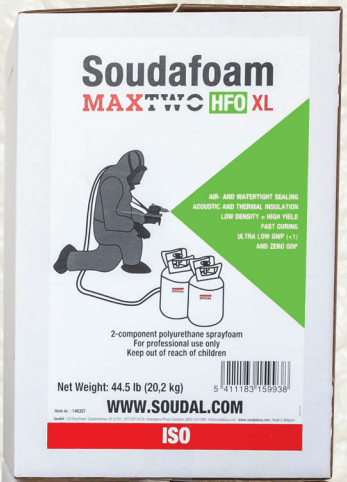

THE FUTURE OF SPRAY FOAM INSULATION IS NOW!

HFO

Patent-pending formula has
1,000 times lower impact on
global warming vs HFC

SOUDAL

BUILD THE FUTURE

Soudafoam MAXTWO HFO

HFO

- Patent-pending formula containing HFO blowing agent
- HFO has 1,000 times lower impact on global warming vs HFC
- Many states plus Canada have restrictions on HFC-containing products
- No sacrifice in performance

PRODUCT DESCRIPTION

These products are based off a patented formula containing an HFO (Hydro Fluoro Olefin) blowing agent that has a global warming potential of 1, compared to the blowing agent currently used by the competition having a global warming potential of over 1,000. That's right...MAXTWO is 1,000 times better for the environment as compared to the competition, and there is no sacrifice in performance and no upcharge as is typically seen with better environmental performance. The MAXTWO family of new spray foam products will have a density of 1.75 lbs/ft³, an initial R value of 6.9 per inch, and will have a shelf life of 12 months from date of shipment. Also, MAXTWO will offer a patented dispense system, including a mix nozzle that reduces the potential for back-flow from either component and minimizes the risk of clogging during the application. These features will help the user obtain a more consistent and high-quality foam.

Where to Use

- 1** Sealing insulation board joints
- 2** Crawlspace insulation
- 3** Insulating and sealing of rim joists
- 4** Residential wall insulation

Soudafoam MAXTWO HFO is a high quality 2-component polyurethane spray foam for filling and sealing in professional and industrial applications. It is supplied in two portable, disposable and pressurized cylinders requiring no external power source, no extra pressure and no pumps. The patent-pending dispensing gun is equipped with specially developed nozzles, assuring a high-quality foam is produced.

SYSTEM TYPES

200 & 600 BOARD FOOT KITS AVAILABLE IN FIRE-RATED AND NON FIRE-RATED VERSIONS

200 BF

1 box, approx. 42 lb

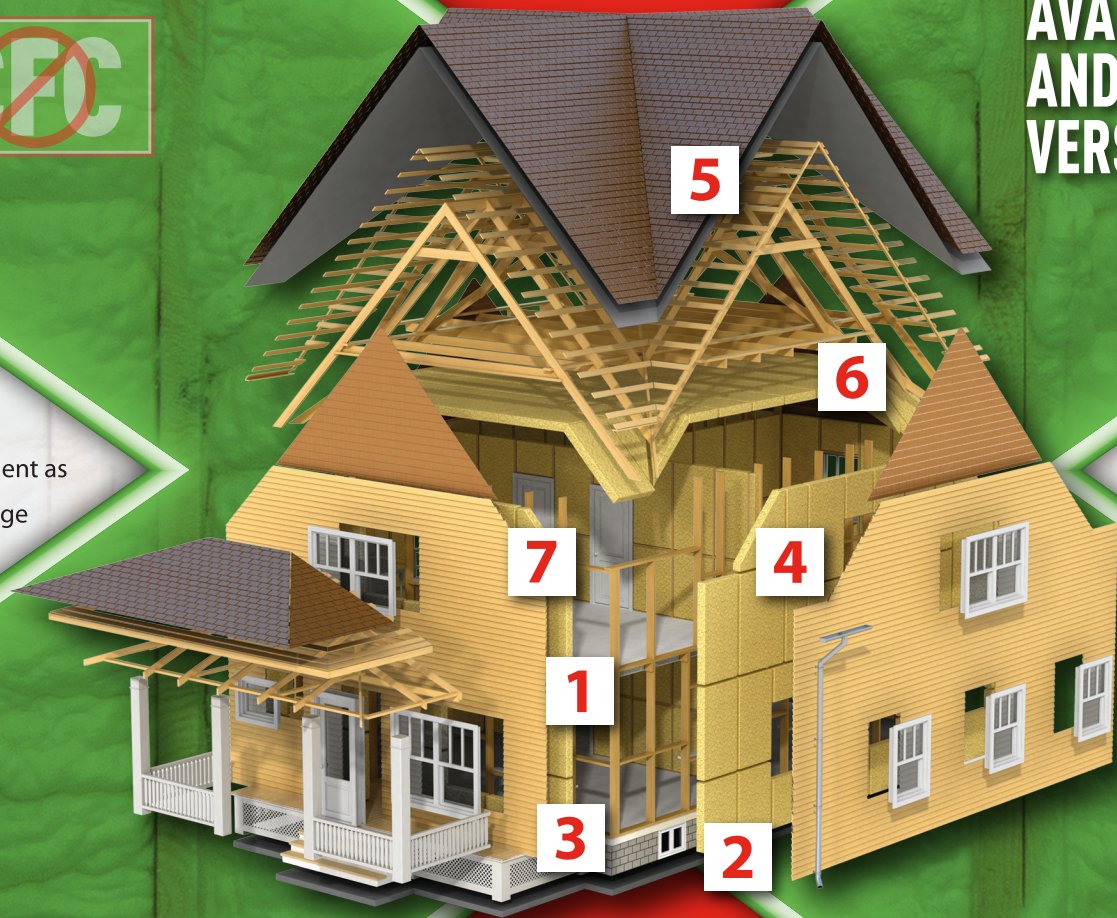

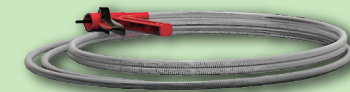

600 BF

2 boxes, each approx. 55 lb

GUN/HOSE ASSEMBLY ACCESSORIES KIT

- 1 box of approx. 1.75 lb
- 1 Soudal dispensing gun
- Tube gun lubricant
- 2 hoses, each 9 ft (15 & 30 ft also available)
- 12 nozzles (8 cone & 4 fan)
- Wrench

DISPENSING GUN

- Patent-pending dispense system helps eliminate back-flow from either component
- Delivers more consistent and high-quality foam
- Product has initial R value of 6.9 per inch and 1.75 lbs/ft³

- 5** Air sealing attic and penetrations

- 6** Sealing the roof/wall juncture

- 7** Repair of high pressure sprayed walls and non-load bearing floors
